

CHAPLAIN'S CHAT

By blessing others one blesses oneself. It is impossible to bless others without blessing ourselves. It is a fundamental principle in life. When we reach beyond gratitude and joy we are blessed by an inward feeling of fulfillment, knowing that we have made a difference in someone's life on earth. We are blessed ourselves when helping another fellow human being on the pathway of life. Our own spirits and attitudes are lifted up and blessed. We are blessed by the positive perception that others have of us. Our reputation grows in a positive way. More over God blesses us in ways we could never imagine possible. So let us be a blessing to friends, family, and our co-workers. Have a Blessed Easter from the Chaplaincy Committee.
