

Mission Statement

Children are born with a curiosity about the world and their environment.

Our program is designed to meet the child's needs, to foster development of competence in intellectual and social skills, and to provide a safe, nurturing environment.

Our goal is to help build children with self-confidence and a strong sense of self direction. In an environment where children are encouraged to make choices, they are able to both experience the arts and have fun while learning.

Our curriculum is developed through extensive assessment, the identification of individual and group goals and planning of appropriate activities according to age. Children who feel good about themselves enjoy what they are doing and make great learners.

Using a hands-on approach allows a child to take an active role in the learning process.

Our strong commitment to working with parents is evidenced through parent activities and programs.

Our hope is that you will be comfortable enough "Where You Can Go To Work Without Worries."

This is my promise to you.
